Zucker, S. 349

## SUBJECT INDEX

accretion 115, 191
accretion disks 191
accumulation of grains 43
anomalous extinction 221
Antarctica 395
antiblooming CCD 173
aperture synthesis 391
astrometry 385, 433, 453
astronomical spacecraft 433
atmospheric effects 385

binary stars 231, 271
binary systems, planets within 335
black dwars 57
brown dwarfs 349

candidate stars, individual objects 335
candidate stars, selection of 335
α Centauri 335
chamaeleon 215
circumstellar disks 125, 159, 167, 173, 231, 239
circumstellar dust 221
circumstellar dust cloud 125
circumstellar gas 107
circumstellar material 147, 191, 261, 407, 417, 433
collapse 139
comets 1, 23, 407
coronagraphic imaging 433
coronograph 441
correlation analysis 349
cosmogony 13

detection 321
Deuterium 1
differential astrometry 299
diffraction suppression 441
disk formation 239
disks, circumstellar 181
disks, pre-planetary 181
Doppler shift 271
dust 215
dust blob 33
dust emission 197
dust extinction 261

early evolution of planets 13
earthlike planets, detection of 335
eclipsing binaries 335
equatorial inclinations, parent stars 335
evolutionarily young stars 221
exobiology 321, 327
exoplanet 327
extra-solar planetary systems, search for 395
extra-solar planets 251, 327
extrasolar planet detection 369

fractals 43

gas disk 33
gaseous accretion disk 49
giant planets 1
grain aggregates 43

habitability 23
Herbig Ae/Be stars 221
high-resolution imaging 159
HR 5999 115

images 173
infrared 395, 407, 423
infrared astronomy 417
infrared stars 191, 261
interferometric observations 239
interferometry 159, 391
isoplanicity 299

jovian planet 33

Jupiter 23, 57

Kuiper belt 407

life in the universe 327
long-baseline interferometry 385
Lyot coronagraph 369

millimetre radiation 215
mm-wave interferometry 181
molecular clouds 139
multiplex photometry 293

neutron stars 67, 91
nitrogen 1
noble gases 1

observational proof of planets 77
observing techniques 357
orbital inclinations, planets 335
origin of life 327
origin of the solar system 13
outer planets 1
oxygen 321

perturbation signatures 77
β pictoris 147, 167, 173, 407
photometric method 335
planet detection 33, 281, 293, 385, 391, 433, 441, 453
planet formation 23, 33, 49, 125, 167
planetary atmospheres 321
planetary nebulae 61
planetary searches 293
planetary systems 67
planetary systems detection 327
planetary systems search 357
planetesimal collisions 43
planetesimal migration 49
planetesimals 1, 13
planets 61, 91, 271
planets around other stars 57
Pluto 1
pre-main sequence stars 115, 125
primary atmosphere 33
processes of star and planet formation 57
protoplanetary systems 107
protoplanetary disks 13, 91
protoplanets 417
protostars 139, 197, 239
pulsar planets 77
pulsars (PSR1257+12) 91

radial velocities 271, 281, 349, 357
radio pulsars 67
radio stars 251
rings 61
rotational shearing interferometer 369

space astronomy 417
space observatories 423
Speckle holography 299
Speckle interferometry 299
spectral energy distribution 215
spectral lines 147
spectroscopic binaries 271, 349
spectroscopy 115, 271
star formation, high-mass 197
star formation, low-mass 197
star formation, medium-mass, 197
star formation rate 197
starlight suppression 369
stars 271
stars, early-type 107
stars, low-mass 191
stars, pre-main sequence 191
stellar atmospheres 271
stellar coronography 167
stellar evolution 197
submillimeter 391, 395

T Tauri stars 231, 239
techniques, interferometric 385
telescopes 453
Triton 1

ultraviolet spectra 107

variable 115
variable stars 125
Vega disk 407
very low mass stars 57
visual binaries 271, 335
VLBI astrometry 251

young stellar objects 159
